SPECIAL OFFERINGS IN FLOWER SEEDS

A few of these are new, but the majority are old garden favorites that are again taking their proper place in the gardens of discriminating people. The old Everlasting Flowers are an example of this revived taste. Lost sight of for years when winter bouquets went out of style, they have been revived with a whirl for cut flowers and for the garden.

ASTERMUM MIXED COLORS. A new race of Asters of the Comet type, larger, stronger, and very free flowering. The flowers are borne on 20-inch stems, and the plant bears from 12 to 15 of these great flowers.

Only three colors to offer in this new variety—white, pink, lavender. You will like these Astermums. 15c. per packet.

GIANT CREGO ASTER MIXED COLORS. The Giant Crego Aster unites all the virtues of the Giant Branching and Comet types, and has all the colors of those two varieties. It is the best selling cut-flower variety on the market. 10 cents per packet.

CARDINAL CLIMBER A distinct new climber, with lacy, lacinated foliage and bright crimson flowers. The blooms are about an inch in diameter, and borne in clusters of seven to ten. In rich soil and a sunny situation will grow 25 feet in a season. Start the seed in the house early and set out when all danger of frost is over. The seed should be soaked in lukewarm water for several hours before planting. Keep the vine well fertilized and watch it grow. 25 cents per packet.

LUPINS Beautiful hardy border plants, from which arise in continuous succession stately spikes; the colors are mostly delicate blues, pinks, and creamy-whites. Fine to plant among shrubbery, as it likes partial shade. Mixed colors. Perfectly hardy. 10 cents per packet.

LYCHNIS JERUSALEM CROSS. Old favorites that add brilliancy to the garden from June to August. Blooms constantly in dense flat heads; colors range from white through rose to the densest shade of scarlet. I offer only the best Haageana Hybrids mixed. Perfectly hardy. 10 cents per packet.

LAVATERA ANNUAL MALLOW. Desirable for large borders, and for cutting. In bloom all summer. Very showy. The large open flowers are of the most exquisite satiny sheen. There are two colors—white and pink. I offer you the two varieties mixed. 10 cents per packet.

EVERLASTING FLOWERS MIXED VARIETIES AND COLORS. Grown as a cut flower for their purity of color and fine keeping qualities, for the garden for their constant blooming habit, and for winter bouquets they are an all-round good flower. Sow early indoors and transplant to the open ground. For winter, cut when half open and dry in a cool place with the heads hanging. 10 cents per packet.

PENSTEMONS NEW HYBRIDS MIXED. A most valuable hardy perennial, its tall spikes of white and lavender and rose shades are beautiful. There is nothing finer for cut flowers for large vases; especially fine for church decoration. All colors mixed. 10 cents per packet.

DAHLIA MAMMOTH MIXTURE.

The seed of this mixture is saved from the largest and most double flowers, and of only the choicest colors. No better Dahlia seed is grown than this I offer you. The seed is from the Show, the Cactus, the Peony, and the Decorative types. I have seen blooms almost a foot across from this seed, and the colors were from the most delicate to the deepest and richest. Sow indoors very early, and they will bloom before those grown from tubers. As easily grown as Zinnias. 25 cents per packet.

THE CREAM OF THE NEW ROSES

I here offer what is good in the new Tea and Hybrid Tea Roses. To have what is good you must try these Roses. They are the best that England, France, Ireland, Italy, Holland and America can produce.

PRICE, 35 CENTS EACH, EXCEPT WHERE NOTED. TWO-YEAR PLANTS, 60 CENTS, EXCEPT WHERE NOTED.

- AUTUMN TINTS** (H. T.)—Coppery-red shaded with orange and salmon; flowers produced in great profusion. An exceedingly attractive garden Rose. Similar in color to Mme. Edward Herriott. Very lovely.
- COLUMBIA** (H. T.)—This is a new American Rose, grown by the veteran rosarian E. G. Hill. It is a very vigorous grower of a true pink shade, deepening as it opens to glowing pink. A peculiarity of this variety is that the shades all become more intense until the full maturity of the open flower is reached, and this color is enduring.
- COUNTESS CLANWILLIAM** (H. T.)—Flowers very large and full, produced in endless abundance; buds long and pointed, opening to large, full, high centered flowers of great beauty and refinement. Color delicate peach-pink at the base of the petals, which are flamed and heavily edged with deep cherry-red, a beautiful contrast of color. A charming Rose. Gold medal, N. R. S.
- CRIMSON CHATENAY** (H. T.)—This is the Crimson Chatenay, a great Rose. All know the Mme. Abel Chatenay. Well, this is a crimson form with all the other good qualities of its parent.
- CRIMSON QUEEN** (H. T.)—A very strong, upright grower, flower large and full. Color a rich bright velvety-crimson. A grand garden Rose, as it is always in bloom.
- ETINCELANTE** (H. T.)—Bright brilliant red, shaded with purple, large, full and of fine form, opening into an enormous bouquet of fragrance; bud elongated, of brilliant velvety crimson color. Free flowering. Extra fine.
- FLORENCE FORRESTER** (H. T.)—Clear snow-white with a lemon tinge; as the flowers age they become a pure white; the blooms are even larger than Paul Neyron. Its habit is absolutely perfect, and the freedom with which it flowers is marvelous. I consider this Rose the grandest of all whites for bedding. For size and substance has no equal among Hybrid Teas. Is very sweetly perfumed. Gold medal, National Rose Society.
- FRANCIS SCOTT KEY** (H. T.)—It is very fitting that such a fine new Rose should be honored with the name of the author of the "Star-Spangled Banner," and also that it should hail from Baltimore, one of whose forts was being assailed when the inspiration came to the author to write our national anthem. The flowers are from large to very large, with sixty or more petals opening to a high center. The color is a magnificent deep red rose. Wherever it has been staged this Rose has swept all competitors from the boards and secured every prize it has entered for. Grand for the garden.
- GLADYS HOLLAND** (H. T.)—Of magnificent form and size. Color buff, shaded orange-yellow, outside of petals pearly-peach. Very free flowering. Awarded a gold medal, National Rose Society of England.
- GLOIRE DES BELGES** (H. T.)—Growth vigorous and free, flowering continuously until late in the season. Buds oval, long and of elegant form with vivid colors of carmine and cochineal. Fine for massing and a fine cut flower.
- GOLDEN EMBLEM** (H. T.)—It is a great improvement on Rayon d'Or, the color being richer and deeper, with larger and more perfect blooms. It is so perpetual flowering that as a garden and bedding Rose it is without a rival. At its best it surpasses Marechal Niel in shape. Its habit of growth is ideal; free and branching with holly-like, glossy green foliage; delightfully scented. This bids fair to be the finest yellow Rose in cultivation. Awarded Gold Medal by the National Rose Society of England. \$1.00 each; 2-year plants, \$2.00.
- GOLDEN SPRAY** (H. T.)—Unique in habit and growth, it sending up long arching shoots which form great loose elegant sprays, every bud of which opens up in succession. The buds are very long, of deep Marechal Niel yellow, opening to almost single blooms of clear lemon-yellow. Awarded gold medal, National Rose Society of England.
- GORGEOUS** (H. T.)—Flowers large and full, exquisitely formed and produced in endless profusion. Deep orange-yellow and heavily veined with reddish copper, the most charming and gorgeous coloring which has yet been introduced. The most striking Rose in existence. Gold medal N. R. S.
- HADLEY** (H. T.)—In color it is a deep velvety crimson, retaining its brilliancy at all seasons of the year. The variety is double and buds are well formed. The fragrance is excelled only by American Beauty. It is a strong, rapid grower, and the flowers are borne on long, stiff stems. It has proven itself under thorough trial to be an all-the-year-round forcing variety.
- HENRIETTE** (H. T.)—One of the finest in existence for bedding, garden and cut-flower purposes; blooms erect on long stems; buds long and pointed. Color fiery orange-crimson, changing to soft coral-salmon. Very hardy. Free in habit.
- HOOSIER BEAUTY** (H. T.)—I use description of E. G. Hill Co.: "If you need a more profitable red Rose than the one you are growing, 'Hoosier Beauty' is your variety. It is as fragrant as Richmond; has more petals, a stiffer stem, a texture like velvet. In color, glowing crimson-scarlet, with darker shadings. The bud is of good length, ships well in the close-cut state, and opens into a magnificent bloom, quite dazzling in velvety brilliance. As soon as thoroughly established in the soil sends out long, stiff growths with a bud on every shoot."
- IMOGEN** (H. T.)—Center of flower orange-yellow, shading to pale yellow and creamy-white at the outside; beautiful long pointed buds opening to flowers of form; a splendid acquisition.
- KILLARNEY BRILLIANT** (H. T.)—The introducers are to be congratulated sixteen years after the advent of Killarney in giving us this distinct novelty, which is undoubtedly the best of the Killarney type. Killarney Brilliant has the same habit of growth and the same freedom of bloom as its parent, while the flower is more double. The color is a very brilliant pink and varies like Killarney. In the garden in bright weather is clear pink, and in dull weather almost crimson. Extra.
- LADY PLYMOUTH** (T.)—The color is a pearly, delicate but deep ivory-cream, faintly flushed, giving it a most piquant finish that is difficult to describe. Awarded gold medal National Rose Society of England, and silver medal at Crystal Palace Show, London.
- LADY ROBERTS** (T.)—The color is a rich golden-yellow; very free bloomer and a grand garden Rose.
- LOS ANGELES** (H. T.)—Los Angeles is, by all odds, one of the finest Roses ever introduced. The growth is very vigorous, and produces a continuous succession of long-stemmed flowers of a luminous flame-pink toned with coral and shaded with translucent gold at the base of the petals. In richness of fragrance it equals in intensity the finest Marechal Niel. The buds are long and pointed and expand into a flower of mammoth proportions, while the beauty of form and ever-increasing wealth of color is maintained from the incipient bud until the last petal drops. 75 cents each; 2-year plants, \$1.50.
- LILLIAN MOORE** (H. T.)—No Rose ever has been offered to the public with the same credentials, having won in strenuous open competition with Roses from all countries of the world the much-coveted One-Thousand-Dollar Trophy offered by the "Panama-Pacific Exposition" for the best new seedling Rose not in commerce, and named "Lillian Moore" in honor of the wife of the president of the exposition, Mr. Charles C. Moore. Color deep pure Indian-yellow with slightly deeper center; long buds; free bloomer.
- MADAME COLLETE MARTINET** (H. T.)—A vigorous grower of coppery-orange color. The color is very deep and clear, and holds well, which can be said of few yellow sorts. It is a nice grower, free in bloom, and those wanting a yellow different from "Ward" or "Sunburst" should try this one.

THE CREAM OF THE NEW ROSES—Continued

Los Angeles

MADAME MARCEL DELANNEY (H. T.)—A surprisingly beautiful novelty raised by the introducers of the popular Rose Jonkheer J. L. Mock, and honored with the award of the Gold Medal of the Bagatelle Gardens at Paris, 1915. It is distinct and peculiar in color, a pale soft pink or rose shaded with hydrangea-pink. The flowers are very large, full and fragrant, perfect in form, and borne on rigid stems. The growth is vigorous and very floriferous.

MOLLY BLIGH (H. T.)—This Rose is described by the introducers as a queen among queens. The flowers are large, ideal shape, deep spirally pointed, of a deep maddery-pink heavily zoned orange-madder at the base of the petals; exquisitely fragrant and very free.

MISS WILMOT (H. T.)—The most refined and charming Rose ever raised. There is an appealing sweetness about this most distinct variety that will please lovers of Roses all the world over. The color is practically a uniform soft sulphury-cream, with the faintest flush towards the edges. In shape and form this Rose is a model of perfection, every flower comes perfect and produced with a freedom that is marvelous. A wonderful garden Rose. Gold medal, N. R. S.

MR. P. L. BAUDET (H. T.)—Color carmine-rose flecked with salmon-yellow, center darker. Flowers large and full, vigorous in growth, continuous in bloom. A unique two-tone Rose.

MRS. HUGH DICKSON (H. T.)—A grand Rose for any purpose. Deep cream with a heavy suffusion of orange and apricot, delightful perfume, one of the most beautiful and useful Roses. S. G. medal, N. R. S.

MRS. A. GLEN KIDSTON (H. T.)—Of the lovely type of "Lady Pirrie," and a perfect bedder. Color rosy-carmine, brilliant and attractive. Buds pointed, rich tea fragrance. Habit, branching growth, freely produced.

MRS. BRYCE ALLAN (H. T.)—Strong Moss-rose perfume. Color carmine-rose. Flowers globular in form, very erect stems, deep green foliage.

MRS. CHARLES BELL (Pierson, 1918)—This new Rose will appeal to those who grow Roses out of doors. It may be described as a shell-pink Radiance, and is a sport of that well-known Rose. It has no characteristics which make it distinct from Radiance except that it is shell-pink. Mrs. Chas. Bell, Red Radiance and Radiance offer a range of color that will be welcome, and there are no finer garden Roses for America than these three.

MRS. CHARLES RUSSELL (H. T.)—This wonderful new American Rose has taken the country by storm. No other forcing Rose except "American Beauty" can compete with it when it comes to counting points. Stems three feet long, stiff and surmounted by grand rosy-pink blooms of the largest size and build.

MRS. CAMPBELL HALL (Tea)—Delicate creamy-buff, edged or suffused rosy-carmine. The center of the bloom is warm cerise coral-fawn. Very deliciously fragrant. Awarded gold medal, N. R. S.

MRS. HENRY WINNETT (H. T.)—This is a seedling raised by John H. Dunlap, of Canada, and has the distinction of being the first seedling Rose of Canadian origin that has been offered in commerce. In color it is a bright shade of crimson, not so dark as Hadley, and not so light as Richmond. It is a color that pleases the retail storeman and his patrons. The finest of all the red or crimson varieties. The buds are long and well formed. A superb red Rose.

MRS. MACKELLAR (H. T.)—The glorious blooms make this an imposing Rose. A deep citron or delicate pure canary color. As the large blooms gracefully expand the guard petals charmingly reflex and become pearly primrose-white of great decorative beauty. Award of merit (unanimous), R. H. S., London.

MURELLE (T.)—A Rose of the type of Safrano, only a much stronger grower. It is a very free bloomer and is a Rose with a great future. Color rosy-blush flushed with saffron-yellow.

NATIONAL EMBLEM (H. T.)—Dark crimson of perfect shape, habit and inflorescence; as a bedding, massing and cutting Rose it is unique. Buds long and pointed, opening to large, full, handsome flowers of great beauty, flowering freely.

NERISSA (H. T.)—This Rose was given an award of merit from the Royal Horticultural Society of England. Why they did not give it a gold medal is beyond my ken. An enormously large, full flower, of fine shape, making a magnificent effect in the garden. Growth vigorous. This is a great Rose.

Miss Wilmot

THE CREAM OF THE NEW ROSES—Concluded

PINK OPHELIA—This is a much improved Ophelia, having more color in it. A bright rosy-pink.

PREMIER—This is the long-looked-for deep Rose for the garden; a beauty, and one you will be pleased with. It is a very free bloomer, almost smothering the plant. The color is bright and attractive. The growth is all that is to be desired, and altogether a wonderful Rose. 50 cents; 2-year plants, \$1.00.

RED RADIANCE (H. T.)—All who know that grand Rose Radiance will welcome this red form of that great favorite. Radiance is a Rose that does well everywhere, a fine grower and free bloomer, and no prettier pink Rose grown. Red Radiance is its exact counterpart except that the color is a rich deep red.

ROSE MARIE (H. T.)—This is a grand Rose of the very highest merit. A rich red that has come to stay. Might best be described as a bright water-melon-red. Very desirable.

SALLIE (H. T.)—The flowers are large and full, outer petals creamy-flesh, gradually deepening towards the center of the bloom, with splashes of rich yolk-of-egg color. Awarded first prize at the International Show, Chelsea.

TIPPERARY (H. T.)—In color stands between Lady Hillingdon and Melody, showing an attractive shade of soft golden-yellow in bud and half-developed flower. Its freedom of flowering and its habit of growth will make it one of the most desirable Roses of its color.

WARRIOR (H. T.)—Buds blood-red; when fully expanded, vivid scarlet. I recommend it as one of the best of the new Roses.

Golden Emblem

W. C. GAUNT (H. T.)—Of medium size, with pointed buds, with naturally reflexed guard petals of brilliant velvety-vermillion, tipped scarlet. Stems rigid, habit branching, large oval beech-green foliage. Rich tea fragrance; very rich in color.

THE "EXCELSIOR" LIST OF EVER-BLOOMING ROSES

New and Choice for Outdoor Planting or House Culture

Price, 20 cents each; any six for \$1.00. If you leave the selection of the varieties to me, I will send seven for \$1.00. Large 2-year-old Roses from this list, 40 cents each, or three for \$1.10.

For general planting, more especially in open ground, this class excels all others. One-year-old plants, such as I send by mail, bloom the first and each succeeding year from early spring until severe frosts. Two-year-old plants, of course, yield a greater profusion of flowers, owing to their size. The flowers are noted for their exquisite coloring and delightful fragrance; hardy everywhere in open ground with protection of litter, leaves, evergreen boughs or similar materials. Plant liberally of 1-year-old Roses; the harvest of bloom they give the first year compensates for the trifling outlay. Any one can succeed with them.

POLYANTHA, OR BABY ROSES

A class of miniature Roses derived from the Climbing Polyantha. They are of dwarf habit and bloom so freely as to cover the entire plant with bloom all through summer and fall. The plants are splendid for bedding, or as edgings for borders they are hardy. Let me tell you something about these miniature Roses. While Europe has appreciated these Roses for years, America is just beginning to wake up to the fact that they have come to stay. They are useful, either pot-grown or for bedding purposes or for hedge effect.

PRICE, 20 CENTS EACH; SIX FOR \$1.00; 2-YEAR-OLD PLANTS, 50 CENTS EACH; THREE FOR \$1.25.

- ANNA MULLER**—The pink Baby Rambler; always in bloom.
- BABY RAMBLER**—Completely hides itself all summer; bright red.
- CATHERINE ZEIMET**—The White Baby Rambler; extra.

- ERNA TESCHENDORFF**—Deep crimson, flushed with carmine; very dark.
- JESSIE**—Bright cherry-crimson; superb.
- LE PONCEAU**—Dark red in large clusters.
- MADemoiselle CECILE BRUNNER**—This is the popular Baby Pink Rose. In the past year or two this Rose has fairly jumped into popularity. It always was a popular outdoor Rose on the Pacific Coast, but recently even in the effete East and everywhere in America they are planting it simply by thousands for cut flowers. It has become quite the rage. It makes a handsome miniature Rose, coming in sprays of three to five buds, and combines in beautiful effect with so many other flowers in all kinds of floral work. It is a very prolific bloomer and if carefully protected in winter should be a money-maker, both outdoors and under glass. Bud and flower are both handsome. Color blush, shaded light salmon-pink; distinct and desirable.
- MARIE PAVIE**—Elegant white, flushed with pink.
- MRS. WM. H. CUTBUSH**—Flowers the delicate pink of Dorothy Perkins.
- PERLE D'OR**—Coppery-orange, changing to fawn.

NEW POLYANTHA, OR BABY ROSES

PRICE, 35 CENTS EACH; 2-YEAR-OLD PLANTS, 60 CENTS.

- BABY DOROTHY**—This is a glorious Rose. Flowers resemble the Dorothy Perkins. Completely hides the plant with its bloom.
- BABY ECHO**—The best Polyantha produced. Color rosy-flesh color. Of splendid strong growth and freedom of bloom, which are of wonderful keeping qualities either on or off the plant. This is the improved Baby Tausendschoen. It has more substance and more color, and is the best of all Baby Roses for pot culture. Be sure to try this one.
- BABY TAUSENDSCHOEN, or THOUSAND BEAUTIES**—Its flowers are large, so much like Thousand Beauties that it has been rechristened Baby Thousand Beauties. It is a bush form of the Thousand Beauties, having all the charm of the variable coloring in its flowers that its parent has, being firm, white, delicately flushed pink, changing to deep rose-carmine. A splendid Rose. Try it.
- EDITH CAVELL**—Bright crimson; white eye; very beautiful.
- ETOILE LUISANTE, or BABY HERRIOT**—Just picture to yourself the Fairy or Sweetheart Rose ("Cecile Brunner"), colored up like the Daily Mail Rose ("Mme. Edouard Herriot"), only brighter and more brilliant than when that variety is at its best, and you will have some conception of the beauty of this little gem which, on account of the similarity in color, has been known among the cut-flower trade as Baby Herriot. Its color is a shrimp-pink with intense coppery-scarlet suffusion, the base of the petals golden-yellow which intensifies and lightens up its high colors. The plant is of free growth and floriferous. I am certain that Baby Herriot will please every one.
- GEORGE ELGER**—A lovely little golden-yellow Polyantha Rose, with a good admixture of Tea blood; like all of its class, it is free in growth, free in bloom, with small, glossy foliage produced in profusion. The dainty little pointed yellow buds open into pretty little symmetrical Roses. Will prove a very popular corsage variety; is grown in quantity now for this purpose.
- GREETING OF AACHEN**—Yellowish-rose colored with salmon-pink and red shadings; full, strong, free blooming and disease proof; erect and of moderate growth. Owing to the size and beauty of its flowers and its symmetrical growth, this variety is highly recommended for low, bright massing.
- LE MARNE**—Dwarf, perpetual flowering Polyantha. Semi-double flowers, bright salmon-rose at the edges, rosy-blush inside. Blooms abundantly and continuously in bouquets of fifteen to forty flowers. Has fine keeping qualities.
- MLLE. FRANCISQUE FAVRE**—Dwarf Polyantha. Robust in growth, quite continuous in bloom, flowering in large trusses of single flowers. Color, velvety-crimson, with large silver-white eye. Extremely showy.
- ORLEANS**—The showiest and prettiest of all the Baby Ramblers. This charming and dainty Rose is of beautiful rounded habit and is a huge bouquet of deep cerise or Geranium-pink, with distinct showy center of pure white; florets not crowded, but of beautiful arrangement, making as a whole a charming combination that cannot be beaten. The color is irresistible. The plant grows like a weed and the flowers are nearly "Immortelle" in their lasting qualities. I believe that they will outlast almost any other Rose in existence with their stiff paper-like texture. This pretty Rose has taken Europe by storm and is making a sensation in this country. Awarded gold medal.
- ROSARIE, or PINK THOUSAND BEAUTIES**—This is a bright pink form of that famous Rose, "Thousand Beauties." A grand Rose from any standpoint.
- TIP TOP ("Baby Doll")**—This delightful little "Sweetheart" Rose is a wonder. The color is absolutely new, and quite startling in its brilliancy, golden-yellow tipped with clear, bright cerise. The foliage is narrow, long and sharply pointed, a deep glossy green—a very beautiful setting for the lovely little doll roses, a bench of "Baby Doll" being an even parterre of delicious color.

"FAMOUS" Rose Collection for Garden Planting

We guarantee that no better Twelve Roses for the garden were ever offered than this "Famous" Collection. Try them.

PRICE, 20 CENTS EACH; THE ENTIRE TWELVE FOR \$1.75; 2-YEAR-OLD PLANTS, 50 CENTS EACH; THE ENTIRE TWELVE FOR \$5.00.

- ANTOINE RIVOIRE**—This is the famous Mrs. Taft Rose of the fashionable Eastern markets. This Rose is in a class by itself; no Rose ever produced has such substance of petal; color creamy-white, with rainbow tints; a beauty and a wonder.
- BESSIE BROWN**—A Rose of transcendent beauty; of the largest size; color pearl-white, with a delicate tinge of fawn.
- ETOILE DE FRANCE**—For the best red garden Rose it lies between this one, Rhea Reid and Helen Gould. Some say one and some the other.
- ETOILE DE LYON**—Still the best large golden-yellow Rose.
- HELEN GOULD**—A rich red Rose that is a great bloomer; the shade of red has been described best as a watermelon-red; elegant.
- HELEN GOOD (The Beauty Cochet)**—What the introducers say: "This is a true Cochet Rose, and after two years' trial in the garden we pronounce it as good if not better than any Rose for the garden ever sent out. We bought the entire stock of this Rose, paying \$1,000 for two plants, this being by far the highest recorded price ever paid for any Rose. The color is a delicate yellow, suffused with pink, each petal edged deeper, very chaste and beautiful. The color, with its immense size and exquisite form, makes it without question the greatest Tea Rose ever introduced, and we are proud to have brought it out."
- KAISERIN AUGUSTA VICTORIA**—A grand white garden Rose that has stood the test of time. Full and double; fine buds and flowers.
- LA FRANCE**—This is claimed by many to be the queen of all the Roses; bright silvery-pink.
- MAMAN COCHET (The Queen of All Garden Roses)**—Such beauty and exquisite form as is possessed by this variety is well-nigh marvelous, and cannot be seen in any other Rose I know of. The buds are beautiful, large, full and firm and elegantly pointed; as they expand they show great depth and richness, sometimes measuring two and a half inches from base to tip. Flowers superb when open, extra large, perfectly double and of splendid substance. Small pot plants will in the open ground quickly make large, strong bushes and produce, on long, stiff stems, great numbers of perfect flowers that are enchanting in fragrance and delicate brightness. The color is rich, clear pink, changing to a silvery-rose. As I see it, one good Rose like any of the Cochet Roses is worth a whole collection of poor ones.
- SOUVENIR DE PRES. CARNOT**—A grand Rose of the largest size; the color a delicate fawn or salmon; extra fine.
- WHITE MAMAN COCHET (No Finer Rose Than This)**—This Rose attracted my attention from the very first time I ever saw it in flower. It is of the largest size, and as you will notice, the flower is built up, or rounded, and very double. The color is a pure snow-white. Sometimes outdoors it is tinged pink, which only adds to its great beauty. No Rose surpasses it in vigorous growth and in immense size of its buds and flowers—indeed, nothing in the Tea family approaches it in size. Deliciously fragrant.
- WM. R. SMITH**—This Rose has several names, such as Charles Dingee, Jeanette Heller, Maiden's Blush, etc. Color delicate blush. It has no superior as a garden Rose.

THE NEW HARDY CLIMBING ROSES

HARDY EVERYWHERE

- ALIDA LOVETT**—Both buds and flowers are large,
are of ideal form, are held on stiff stems a foot and
a half to two feet long, and the color is a lively
bright shell-pink with shadings of rich sulphur at
the base of petals—a combination that is both novel
and beautiful. The flowers are of remarkable sub-
stance and long lived, whether cut or left to remain
upon the plant, and are pleasantly perfumed. It is
very much brighter and more cheerful in color with
larger flowers than those of the justly popular Dr.
Van Fleet Rose. 35 cents each.
- AMERICAN PILLAR**—The flowers are of enormous
size, 3 to 4 inches across, of a lovely shade of apple-
blossom pink, with a clear white eye and cluster of
yellow stamens. These flowers are borne in im-
mense bunches. They last in perfection a long time,
and are followed by brilliant red hips or berries,
which are carried late into the winter. 25 cents;
2-year plants, 60 cents.
- BESS LOVETT**—Resembles Climbing American
Beauty in shape of bloom, but is very much brighter
in color and much more fragrant. The flowers are
clear, bright red, of good size, and of double, full,
cupped form, lasting a long time in good condition.
Beautiful in bud and bloom and the most fragrant
of the Climbing Roses. A vigorous grower and free
bloomer. The large glossy foliage, like that of Sil-
ver Moon, greatly enhances the beauty of the flow-
ers. 50 cents each.
- CHRISTINE WRIGHT, or PINK CLIMBING
AMERICAN BEAUTY**—This is identical with the
Red Climbing American Beauty described next be-
low this variety; flowers four inches in diameter;
color bright, clear pink; immense. Try it; a fine
companion for Climbing American Beauty. 30
cents; 2-year plants, 60 cents.
- CLIMBING AMERICAN BEAUTY**—Same color,
size and fragrance as American Beauty, with the
addition of the climbing habit. Good foliage and
better blooming qualities. One plant of this new
Rose will produce twenty times as many flowers in
June as the old American Beauty, besides blooming
occasionally during the summer. Blooms three to
four inches across; has proven perfectly hardy and
stands heat and drought as well as any Rose in my
collection. 40 cents; 2-year plants, 75 cents.
- GARDENIA (The Hardy Marechal Niel)**—This
grand Rose has proven itself hardy in Virginia and
Tennessee. It is a deep golden-yellow of the larg-
est size. 35 cents; 2-year plants, 60 cents.
- GOLDFINCH**—A deep golden-yellow climbing Rose,
called by some the Yellow Thousand Beauties; a
glorious Rose. 35 cents; 2-year plants, 60 cents.

THE NEW HARDY CLIMBING ROSES—Concluded

Climbing American Beauty

LE POILEAU (New Hybrid Climbing Moss)—Very fine, vigorous bush, with long, heavy branches bearing large, thick foliage of Moss Rose type. The flowers are produced in bouquets of eight to fifteen; large, double and well formed. Color, satin-rose, shading to heliotrope, and nicely mossed. Strong climber. 35 cents; 2-year plants, 60 cents.

PAUL'S CARMINE PILLAR—The earliest of the Climbing Roses to come into flower. Color a rich rosy-carmine with white eye. 35 cents; 2-year plants, 60 cents.

PAUL'S SCARLET CLIMBER—The flowers of this superb Rose are vivid scarlet, shaded with bright crimson. A gold medal Rose of England. A new shade in Climbing Roses. 35 cents; 2-year plants, 75 cents.

RED DOROTHY PERKINS, or EXCELSA—The defects of Crimson Rambler are its unsightly foliage in unseasonable weather and its defoliation by insects; the infusion of Wichuraiana blood assures an ornamental climber which is nearly evergreen, and this will assure this lovely crimson-scarlet pillar Rose a place in every American garden, for it is quite hardy in addition to all its other fine points. The flowers are very double, produced in large trusses of thirty to forty, and almost every eye on a shoot produces large clusters of flowers. The color is intense crimson-maroon, the tips of the petals tinged with scarlet. The finest of all red Climbing Roses. 35 cents; 2-year plants, 60 cents.

SHOWER OF GOLD—Produces masses of flowers in large clusters. Color deep golden-yellow, with orange shadings in the center. Enormous lateral branches are produced, which are densely clad with glossy green foliage that resists disease. This fills the "long felt want" for a hardy yellow Climbing Rose. 25 cents; 2-year plants, 50 cents.

SILVER MOON—Flowers very large, four and one-half inches and over in diameter. Pure white in color; petals of great substance, beautifully cupped, forming a clematis-like flower. The large bunch of yellow stamens in the center adds to its attractiveness. Flowers are borne on strong stems twelve to eighteen inches long, and are delicately scented. The plant is a strong grower, with large, glossy, bronze-green foliage. 35 cents; 2-year plants, 60 cents.

TAUSENDSCHOEN, or THOUSAND BEAUTIES

—A Climbing Rose that comes to us from Germany. The flowers upon first opening are the most delicate shade of pink ever seen in a Rose; might be described as a white delicately flushed pink, changing to rosy-carmine. It gets its name from its many flowers and the variation in coloring. This Rose is sweeping the country like a prairie fire. 35 cents; 2-year plants, 60 cents.

VEILCHENBLAU (The Wonderful New Blue Rose)

—This is a Rambler, and will thrive anywhere, being perfectly hardy. It has created a great stir in the Rose world, for the talk of a Blue Rose has been going on since time immemorial. It first opens a pink color, quickly changing to a decided violet-blue. When the plant is in full bloom it presents a startling effect. 35 cents; 2-year plants, 60 cents.

WICHMOSS, or "CLIMBING MOSS"—This is a wonderful break in Roses, being a cross between the "Wichuraiana" and "Moss Rose."

It has retained the scandent habit of the "Wichuraiana," making long growths five to eight feet in length, with the glazed resistant foliage, while the bud is heavily mossed in bright green and has the peculiar aromatic odor of the Moss family. Flowers borne in clusters, daybreak-pink in color, opening into full, semi-double bloom. A climbing Moss that is a wonder; hardy. 35 cents; 2-year plants, 60 cents.

BEAUTIFUL HOUSE FERNS

There are no plants grown that are more desirable for the house than the following fine decorative Ferns. They are easily grown, free from insects and disease, and thrive well in the ordinary temperature of the living room. See that the plants have plenty of drainage and are kept well watered; never let dry out for any length of time. Every one of these Nephrolepis Ferns is entirely distinct in every way. That I am headquarters for Ferns is evidenced by the choice assortment that I offer. No other firm offers so many distinct and choice varieties. Try me for Ferns.

New Fern "Liberty"

This is my own production. In the past I have sent out Baby's Breath, Teddy Junior and Roosevelt, the three greatest Ferns today, acknowledged so by all plantsmen and flower lovers, and now I add another one to the galaxy, "Liberty," no doubt the best of them. All the fronds have finely divided pinnae that give them a very beautiful appearance, while the whole plant is overlaid with a bluish cast that makes of it a very striking object. Wonderfully beautiful, different from all other Ferns. First time offered. Fine young plants, 50 cents; strong plants, \$1.00. Be sure to try this beautiful Fern.

The "Teddy Junior Fern"

Nephrolepis Teddy Junior

"Teddy Junior," the Fern for every household. This grand Fern was introduced recently by G. & R. The fronds are broad and beautifully tapered from base to tip; they droop just enough to make a shapely, graceful plant, permitting it to finish with a fine full center and perfect symmetrical spread. The pinnae are distinctly undulated, giving the fronds an attractive wavy appearance, which adds materially to their charming decorative effect. "Teddy Junior" will produce about four times more fronds than any other Fern ever introduced, finishing with fifty to sixty fronds in a four-inch pot. Fine young plants, 25 cents; strong plants, 75 cents.

The "Teddy Junior" Fern

BEAUTIFUL HOUSE FERNS—Continued**The "Roosevelt Fern"***Nephrolepis Roosevelt*

It is my good fortune and great pleasure to offer this wonderful new Fern, having introduced it in 1910. In this short time it stands second in popularity of all the Ferns, and will soon be more popular than even the old favorite Boston Fern. In general characteristics it resembles the world-famous Boston Fern, but it will sweep that Fern from the boards for two reasons: it produces many more fronds than the Boston, thus making a bushier, handsomer plant; then the pinnae are beautifully undulated, giving the "Roosevelt" a pronounced wavy effect seen in no other Fern; as the plant ages this effect becomes quite distinct. A charming and most notable variety. Fine young plants, 25 cents; strong plants, 75 cents.

The "Crested Fern"*Nephrolepis Scholzei*

The fronds are crested and stand erect, with a graceful arch, forming a plant of ideal shape, and they never break down, giving the plant a ragged appearance, as is so often the case with other plumed forms; furthermore, the loose, elegant arrangement of the fronds, allowing a free circulation of air through the foliage, prevents the center of even the largest specimens from becoming defective or yellow. The smallest salable plants perfectly express the type, and in every size are models of beauty for table decorations. Fine young plants, 25 cents; large plants, 75 cents.

The "Gold Medal Fern"*Nephrolepis Piersonii*

This Fern received a gold medal from the Society of American Florists and Ornamental Horticulturists, and is the only gold medal ever awarded by them for any plant whatsoever. An entirely new form of the Boston Fern. The pinnae subdivide, making miniature fronds which are superimposed on the main fronds, looking as if two or even three were condensed into one, giving the plant a graceful, feathery and plummy effect. Fine young plants, 25 cents; strong plants, 75 cents.

The "Roosevelt Fern"

The "Big Four Fern"*Nephrolepis Splendida*

This is the most wonderful Fern of them all; it originated with G. & R., and is now offered for the first time. It combines the good qualities of the four most popular sorts. It has the grace of a "Boston," the wavy effect of a "Roosevelt," the fluffy effect of an "Ostrich Plume," and the uniqueness of a "Fish Tail." Some fronds will be straight "Boston," others will be true "Roosevelt," in others the ends of the pinnae will be the feathery "Ostrich Plume," while in others the ends of the pinnae will be the genuine "Fish Tail." Then again some fronds will have in a marked degree all of these desirable traits, forming a combination without parallel among Ferns. It well deserves the name of "Big Four Fern." Every one who sees it goes "dafty" about it. This is without question the most splendid of all the *Nephrolepis*. Be sure to try it. Fine young plants, 25 cents; strong plants, 75 cents.

The "Wannamaker Fern"*Nephrolepis John Wannamaker*

A new Fern of wonderful beauty. Long, narrow, gracefully drooping fronds. It is not so compact as *Scholzei*, and, therefore, is a very airy and graceful Fern, and very durable in the house. A rapid grower; quite distinct from other Ferns. Fine young plants, 25 cents; strong plants, 75 cents.

The "Boston Fern"*Nephrolepis Bostoniensis*

In the vicinity of Boston no other plant is so extensively used as this graceful *Nephrolepis*, which differs from the ordinary Sword Fern in having much longer fronds, which frequently attain a length of six feet. These arch and droop over very gracefully, on account of which it is frequently called the Fountain Fern. This drooping habit makes it an excellent plant to grow as a single specimen on a table or pedestal. This Fern should not be compared with the Ostrich Plume Fern, as they are of an entirely different growth; both have their place and both are beautiful and desirable. Fine young plants, 25 cents; strong plants, 75 cents.

"Gold Medal Fern"

BEAUTIFUL HOUSE FERNS—Continued

"Ostrich Plume Fern"

The "Newport Fern"

Nephrolepis Scottii

Of much dwarfer habit and bushier growth than the Boston Fern. The fronds droop gracefully, and are not as long and heavy as the Boston. It is a rapid grower, and to see it in all stages of growth from a runner in the bench to a fourteen-inch pot specimen will convince you that it will be in great demand as a house Fern. This has always been a favorite variety. Fine young plants, 25 cents; strong plants, 75 cents.

The "Old Original Sword Fern"

Nephrolepis Exaltata

This is the "old original Sword Fern," the "daddy" of them all, the one plant from which all the *Nephrolepis* I offer sprang. It is entirely different from any of its progeny, having narrow fronds that are long and of very erect growth. For this reason it is more largely used as a centerpiece in vases than are any of its descendants. Fine young plants, 25 cents; strong plants, 75 cents.

The "Baby's Breath Fern"

Nephrolepis Goodii

This has the finest foliage of all the Ferns. It is so delicate that a lady on seeing it exclaimed, "Call it the Baby's Breath Fern, as it is so dainty in texture that a baby's breath would set its fluffy foliage in motion." The fronds are very fine and filmy, on which account it has been called by some the Lace Fern. It is an improved variety, and the best of its type. Nothing is daintier or more exquisite than well-grown specimens in any size. My reputation for it that no Fern in existence can compare with "Baby's Breath" in fluffiness. It gives the impression of fine lace work, and has been named in the East the Philadelphia Lace Fern. No one can make a mistake by growing this dainty Baby's Breath Fern. Fine young plants, 40 cents; strong plants, \$1.00.

"Ostrich Plume Fern"

Nephrolepis Whitmanii

A great Fern. In fact, it is a plant that appeals to every one, and on that account will prove a much more valuable and profitable plant than other Ferns of this class. Every one who has seen it is charmed with it. As some one has expressed it, "There is nothing like the Ostrich Plume Fern in cultivation. In decorative effect it so far outdistances the original variety that there is positively no comparison to be made. We consider it the most valuable novelty that has been introduced in many, many years." It has taken gold medals wherever shown. Fine young plants, 35 cents; strong plants, 85 cents.

"Fluffy Ruffles Fern"

Nephrolepis Superbissima

This new Fern is quite different from all other Ferns. Its distinguishing characteristics are its dark green foliage, darker than any other Fern, its dense growth much more compact, and its irregular shaped fronds, which give it the name of "Fluffy Ruffles Fern." The fronds are very heavily imbricated, the pinnae overlapping, and are so formed as to resemble miniature Ferns, giving it the appearance of a Fern within a Fern. The plant is very sturdy in its habit and the fronds firm and rigid, never break down, so that it will stand more knocking around than any other Fern. Fine young plants, 50 cents; strong plants, \$1.00.

The "Philadelphia Lace Fern"

Nephrolepis Elegantissima

The small size pinnae, or leaflets, are subdivided into perfect miniature fronds; the side pinnae stand at right angles to the midrib of the fronds, on edge instead of flat, giving both sides of the main frond the same beautiful appearance. It is impossible to conceive of the beauty and grace of this wonderful Fern from description. Fine young plants, 25 cents; strong plants, 75 cents.

"Baby's Breath Fern"

BEAUTIFUL HOUSE FERNS—Concluded**The "Fish Tail Fern"***Nephrolepis Davallioides Fucans*

This is a grand Fern entirely distinct from any of the other varieties of *Nephrolepis*. Throughout the South and especially at New Orleans this Fern takes precedence over all others. The ends of the pinnae are so formed as to resemble a fish tail, giving the fronds a crested appearance, very effective. It grows into the most shapely plant of any of the *Nephrolepis*. Grand for house culture. Fine young plants, 40 cents; strong plants \$1.00.

"Fish Tail Fern"

The "Parlor Fern"*Nephrolepis Whitmanii Compacta*

This is a condensed form of the "Ostrich Plume" Fern, with valuable characteristics added which are not evident in the parent, the pinnae subdividing, making miniature fronds which are superimposed on the main fronds, looking as if two or more were condensed into one. Graceful beyond description. Fine young plants, 25 cents; strong plants, 75 cents.

Dwarf Ferns for Fern Dishes

I have selected a few of the hardest and most satisfactory varieties for filling Fern Dishes, than which there is no prettier table decoration for winter. Price, 15 cents each; or five distinct Dwarf Ferns for 60 cents.

Dwarf Ferns in Table Dish

GLADIOLI

Their easy culture appeals to all, and the freedom from disease and insect pests is another great asset. They associate so well with all garden flowers, but above all are the decorative possibilities both as a cut-flower subject and also in the garden. The collection I offer here is unsurpassed and will be a source of great delight to all who plant them. The flowers last a long time when cut. Do not be stingy in planting Gladioli, but plant by the dozen, or even by the hundred. Varieties marked with an asterisk (*) are particularly fine for forcing.

Individual flowers large size and seem to stand out boldly, making it very noticeable. 10 cents each; \$1.00 per dozen.

Europa

GRETCHEN ZANG—A large growing variety of a most beautiful soft melting shade of pink, blending into deep salmon on the lower petals. Approaches the brilliant coloring of the Beaute Poitevine Geranium. The color makes it especially valuable for florists' use. Blooms from small bulbs. A first-prize winner and award of merit from Gladiolus Society of Ohio. 25 cents each; \$2.50 per dozen.

LOVELINESS—As its name implies, this variety produces flowers of distinction in daintiness and beauty. The color is of pale creamy tone, soft and delicate, with a roseate tinge in the center. SPLENDID PEONIES

HARDY EVERYWHERE

"ARISTOCRAT OF FLOWERS"

The wonderful improvement made during recent years in these old-fashioned hardy plants has brought them into renewed popularity. The gorgeous flowers, which rival the finest Roses in size, form and color, are produced in great abundance. After once being planted they require little care and attention, thrive anywhere, and are absolutely hardy even in the coldest climates; each year after planting they grow into greater value, producing more and more flowers. They are not troubled with insect pests. Try some of my fine Peonies, and see what grand flowers they are. Get it out of your head that there are only Red, White and Pink Peonies to illustrate at flowering time. People who visit my field will say, "I have Pink and White Peonies. I desire only Red ones," but when they are shown the Pink and White, they invariably exclaim, "How grand! I have none like them." There is as much difference in Peonies as there is in Roses.

SIZE OF ROOTS

The size of roots offered in this catalogue are divisions of two to five eyes. I cannot supply in any other sizes in the springtime. I would ask that my patrons order by number as well as by name, to avoid mistake.

THE CREAM OF THE PEONIES

TREE PEONIES

This is a remarkable species, developed from Peony Mouton, a native of China and Japan. In habit of growth it is not unlike a deciduous shrub—the growths are short and stocky, the plant eventually attaining a height of four or more feet and of large circumference; the foliage is quite handsome, and the immense flowers, which usually appear some two weeks ahead of the herbaceous class, are most remarkable for their immense size and gorgeous colorings. Splendid for grouping or for specimen plants on lawns. While a hardy plant, it will be found desirable to give it some protection in very cold latitudes. All shoots springing from the base should be rubbed off. I offer any color desired, my choice of varieties only, 4-year-old plants, at \$4.00 each.

REMEMBER That so long as I can ship Peonies safely during the spring months I will do so; after it becomes too late I will file your order for them and ship in the fall.

Pansy Geranium, Mrs. Loyal

A Wonderful Plant

This new and wonderful Pansy Geranium is of the easiest growth, dwarf in habit, and literally covered with flowers all the time; and as it requires little or no attention, it is invaluable as a window plant. The coloring and markings of the flowers are most extraordinary—light pink, white, dark purple, black, etc., almost rivaling the Pansy in uniqueness of flowers. It is this combination of coloring which obtained for it the popular name of Pansy Geranium. Strong plants, ready to bloom, 30 cents each; two for 50 cents.

PELARGONIUM, OR LADY WASHINGTON GERANIUMS

The grandest of all flowering plants; do not resemble the common Geraniums in any particular, neither in foliage nor flower; more beautiful in every way. I here offer six distinct sorts, every one entirely different in color and every one a beauty. The Lady Washington Geraniums are the handsomest of all flowers—once seen, never forgotten.

THE EASTER GREETING OR EVER-BLOOMING SET

PRICE, 40 CENTS EACH.

EASTER GREETING—Planted out as a bedding plant, it will bloom continually until late in the fall. It will prove the forerunner of a new race of ever-blooming kinds, as it rivals the Orchids in beauty. This new species is the earliest of all Pelargoniums, with enormous florets and clusters, having light green foliage and of dwarf, robust growth. It blooms from March until fall. Florets fiery amaranth-red, with five large, regular shaped spots. The first and only kind to bloom as well bedded out as in pots, and to do so all summer.

GARDENER'S JOY—The ground color is apple-blossom pink, the two upper petals have blotches of carbon-brown, the florets are three and one-half inches in diameter and are joined to enormous clusters which rise above the beautiful foliage and remind one of a Rhododendron cluster. It is of a half-dwarf nature and very sturdy. On account of its rapid, luxuriant growth it is a very profitable market variety.

GLORY—This splendid novelty is quite remontant,

florets and cluster very large; ground color, Cattleya-blue, very much like the Cattleya Orchid. The upper petals contain two large purple magenta-red spots, distinctly veined. An exceedingly beautiful and entirely new color in Pelargoniums. This kind has a very robust growth.

LIBERTY—A glorious flower of salmon-red, with large velvety, sharply defined blotches bordered with scarlet. Has all the good qualities of Easter Greeting, its parent, having gigantic trusses. Equally valuable as a pot plant or for bedding out.

LUCY BECKER—This grand novelty is a sport of Easter Greeting, and is like it in everything but color, which is a rosy-pink. It is, if anything, even more free in bloom.

PRINCE—Immensely large flowers, strongly crimped, of fine shade, with from six to ten petals; color rich purple with velvety-black blotches. Remarkably robust habit. The large clusters rise gracefully above the beautiful foliage. The blooming plant with its enormous flowers makes a striking impression.

BEAUTIFUL CANNAS

Cannas are called the poor man's Orchid because one may possess a perfect riot of color in his yard or garden for the minimum of both outlay and labor. They grow rapidly and bloom luxuriantly throughout a long season, requiring merely ordinary hoeing and weeding, and they always respond to plenty of water. Soak the ground thoroughly. Planted in beds of any formal shape, in rows or in front of porches and foundation walls, their rich, tropical foliage and gaudy bloom will repay their care and the insignificant trouble of winter storage.

Novelties in Cannas and Those That Are Rare

CITY OF PORTLAND—Too much cannot be said in praise of this lovely variety, as it blooms early and continuously. The mass of bloom all summer is simply marvelous and I strongly recommend this Canna when a rich pink color is wanted. Canna experts pronounce this "the best all-round pink Canna up to date." 35 cents.

FIREBIRD—The best red-flowered Canna; gigantic trusses of immense flowers with petals two and one-half to three inches and over across. Color clear, glistening scarlet without streaks or spots of any kind. 35 cents.

METEOR—Immense trusses of large, rounded flowers, well displayed above the massive foliage; brilliant crimson. Flowers keep well and are self-cleaning. 30 cents.

MRS. ALFRED F. CONRAD—A most remarkable variety, with exquisite salmon-pink flowers of largest size, in erect and abundantly furnished heads. So freely produced as to keep up a superb showing

of its fine bloom for months above the rich green foliage; extra fine. One of the best Cannas grown. 25 cents.

PANAMA—An attractive rich orange-red, well-defined edge of bright golden-yellow. Flowers very large, and the immense spread of the individual blooms coupled with its early free-flowering habit makes this Canna noteworthy. 25 cents.

QUEEN HELEN, or YELLOW KING HUBERT—Immense flowers that are as large as the Orchid-flowering Cannas. Color golden-yellow, evenly and distinctly spotted red. This Canna ranks right up with King Humbert. I have no hesitancy in saying there is no better Canna grown. 25 cents.

WINTZER'S COLOSSAL—Colossal indeed are the flowers and bloom heads of this most magnificent Canna. The effect produced by the vivid scarlet flowers is very striking. It is the largest flowered Canna yet introduced, individual florets often measuring over eight inches across. 35 cents.

CARNATION PINKS—The Divine Flower

For beauty of flower and color, ease of culture, certainty and freedom of bloom, together with exquisite fragrance, this is well called the "Divine Flower." Plants in the open ground or in pots quickly make large specimens, and when brought indoors in the fall produce an abundance of flowers throughout the entire winter. Carnation blooms are expensive; don't buy them—grow them yourself. Pinch the plant back frequently during the summer season. In the fall bring indoors, place in a four or five-inch pot, keep in a temperature of forty to fifty degrees at night, and they will yield an immense number of flowers with splendid stems, as fine as those sold by florists. If not pinched in they will bloom profusely during the summer. I offer the finest varieties in existence. Your order is incomplete without some Carnations.

EXCELSIOR COLLECTON OF CHOICE CARNATIONS

20 CENTS EACH; SET OF THREE EXCELSIOR CARNATIONS, POSTPAID, FOR 50 CENTS; THE ENTIRE EIGHT FOR \$1.25.

GLORIOSA—This variety has been greatly admired wherever it has been seen for its desirable color, being a beautiful light pink satin color; flowers large size and very freely produced. Plant of grand habit and vigorous growth. It is a superb variety.

GOOD CHEER—One of the most fragrant Carnations I have seen. Color a clear, bright, glowing scarlet; a most continuous bloomer and distinct in color from any other sort offered. Greatly admired by all who have seen it growing here.

HERALD—One of the grandest of all Carnations for the garden, a dazzling red color that nothing surpasses.

MATCHLESS—Largest flowers of the purest immaculate white; large sized blooms. Valuable for garden planting and for pot culture. Very sweetly scented with that delightful old-fashioned clove fragrance.

HARDY PERENNIAL PHLOX

This is one of the most easily grown hardy perennials, and the large number of beautiful varieties now offered make it especially desirable. These noble flowers are not only beautiful as individuals, but the cheerful appearance of our gardens during the summer and autumn months is much indebted to them. They succeed in any position or soil, and can be used to advantage either as single specimens in the mixed border or as large clumps or beds on the lawn. To produce the best results, however, they should have a rich, deep and rather moist soil, and let each clump have a space of from two to three feet in which to develop. They will continue to thrive for several years with little attention, as is attested by the fine clumps about old homesteads. The ease with which they are cultivated, their entire hardiness and the extended time of blooming, combined with the varied and beautiful coloring, make them especially valuable for garden planting. The Perennial Phlox usually commence to bloom in early summer, and are brilliant with color until after several frosts have come. They are admirably adapted for cemetery planting, also for a low hedge or screen to hide old fences and unsightly objects. Do not fail to plant Phlox in the fall, any time from September until the ground is frozen.

OSTRICH PLUME CHRYSANTHEMUMS

25 CENTS EACH; THE TWO FOR 40 CENTS.

ENFANT DES MONDES—Pure white, the petals covered with hairs. | **LOUIS BOEHMER**—A most beautiful shade of lavender-pink.

ANEMONE-FLOWERED CHRYSANTHEMUMS

20 CENTS EACH; THE THREE FOR 50 CENTS.

The Anemone flowers consist of one or more rows of flat or tubular ray florets, with shorter quilled or tubular disc florets of the same or distinct color; are being grown in sprays for artistic floral arrangements.

These beautiful varieties are again very popular for outdoor bedding purposes. The blooms last from a month to six weeks, and are borne in immense clusters, almost hiding the plant. The color is bright coral-red, changing to a delicate pink. It is past the power of speech to describe it. A wonder. Fine plants, 50 cents.

GLOIRE DE CHATELAINNE (New Ever-blooming Flowering Begonia)—This new Begonia is undoubtedly the freest-blooming variety known. It is of easy culture, low, bushy habit and literally covered the entire year with a wealth of bright pink flowers with yellow stamens. It well merits the name of

Ever-blooming Begonia. This variety is especially suited for florists, being of the Chateleine type of Begonia, and one that can be handled by every one. 35 cents.

MY GRAND GARDEN DAHLIAS

No garden is complete without a show of these brilliant and stately autumn flowers, and nothing gives greater return for so little money and care. I offer dry bulbs or tubers, but if stock of these becomes exhausted, will send started plants. I grow and sell fifteen acres of Dahlias each year.

CACTUS DAHLIAS

So-called from their resemblance to Cactus flowers. They are characterized by long, narrow, pointed, tubular and twisted petals of graded lengths, giving the flowers a striking and attractive appearance. Grand for cut flowers. 25 cents each; three for 60 cents; the entire set of twelve Cactus Dahlias, costing \$3.00, for \$2.50.

AMOS PERRY—The best bright scarlet Cactus to date. Color purest flaming scarlet, with long, narrow, twisted petals of irregular formation. The blooms are borne well above the foliage in the utmost profusion. Certainly a beauty.

AURORA—Very free flowering; reddish-apricot, suffused with flesh-pink, shading lighter at the tips.

CHARLES CLAYTON—The strongest words of praise are not extravagant when applied to this wonderful new Cactus. It is the ideal in color, form, length of stem and general good habits, beyond which it would seem little could be hoped for. The color is a most intense crimson, so vivid as to dazzle the eye; superb.

COUNTESS OF LONSDALE—For perfection of bloom, erectness of stem, abundance of flower, this variety has never yet been equaled. On several of the plants I have counted over 150 perfect blooms on one plant. Is there any other garden flower that can equal it? The color is a rich salmon-pink, tinted apricot.

FLORADORA—Deep dark, rich wine-crimson, splendid shaped flowers on long, upright, wiry stems.

HENRI CAYEAUX—Old gold shading to orange-yellow; a glorious sort.

J. H. JACKSON—This is without doubt the finest dark Cactus Dahlia. Its velvety black crimson-maroon shade is very striking. Large and perfect.

KRIEMHILDE—A most popular cut-flower variety. Color a brilliant pink, shading to white in the center.

PRINCE OF YELLOWS—One of the best canary-yellows for cutting.

QUEEN OF HEARTS—(New.) The best white Cactus ever introduced. Pure white, shading to lemon-yellow at base of petals; very free bloomer.

REINE CAYEAUX—Brilliant Geranium-red; early and free; a great favorite.

SPRINGFIELD—A new Dahlia of my own introduction. It is identical with Countess of Lonsdale, except in two essentials. It has a darker stem and the flowers instead of being a salmon-pink, as in Lonsdale, in Springfield are a rich amaranthine-red. Its beauty cannot be described. No Dahlia blooms freer, no Dahlia is as pretty as Springfield. It lasts longer cut than any Dahlia I know.

DECORATIVE DAHLIAS

These come next to the Cactus as a cut flower. They are also very showy in the garden, being unusually free bloomers. They are more formal in make-up than the Cactus Dahlias, but not so formal as the Show varieties, being a happy medium between the two. Except where noted, 25 cents each; three for 60 cents; the entire set of twelve Decorative Dahlias, costing \$3.25, for \$2.50.

BLACK BEAUTY—Deep velvety-maroon. The blackest of all Dahlias.

HORTULANUS FIET—(New.) Salmon-pink, yellowish center; as large as Souv. de G. Doazon. Has taken many first prizes. 50 cents.

HORTULANUS WITTE—(New.) Pure snow-white; elegant.

JACK ROSE—A magnificent flower with perfect form. Color rich crimson-red, with maroon shadings. Named for its counterpart among Roses, the famous "General Jack."

Different Varieties of Dahlias

MADAME A. LUMIERE—Ground color white, suffused towards the ends of the petals with red, the tips pointed with bright violet-red.

MATCHLESS—Deep crimson, of large size; an early and late bloomer. This I consider one of the best ten Dahlias. Very showy in the garden.

MINA BURGLE—(New.) The best scarlet-red Decorative Dahlia ever introduced. This wonderful Dahlia is a California introduction and is the best of its color. The form is perfect decorative type, the petals being broad and flat; it has a perfectly full center and is a Dahlia that can be grown to an immense size with ordinary treatment. It was very prominent at the Panama-Pacific International Exposition, where it was grown in masses around the Horticultural building. It shows finely under artificial light and for cutting purposes is unsurpassed. I was fortunate in securing a stock of the variety, and can highly recommend it to my customers.

MRS. J. GARDNER CASSATT—A new rose-pink Dahlia that has attracted a great attention. The flowers are of immense size. Said by many to be the finest of all deep pink Dahlias.

MRS. CHARLES SEYBOLD—One of the freest flowering of all Dahlias. A cadmium-red, an intermingling of red and orange. Very showy.

SOUVENIR DE GUSTAVE DOAZON—This is the largest of all Dahlias. A lovely shade of orange-red. A veritable giant among flowers.

WILLIAM AGNEW—Intense glistening crimson-scarlet, of large size, and gracefully recurving form. The most popular standard red.

ZULU—The blackest of all Dahlias.

SHOW and FANCY DAHLIAS

These are the old-fashioned Dahlias of our mothers' gardens. Perfect in shape and outline. Except where noted, 25 cents each; three for 60 cents; the entire set of nine Show or Fancy Dahlias, costing \$2.35, for \$2.00.

ARABELLA—Primrose-yellow, tipped and shaded old rose and lavender; very fine.

CUBAN GIANT—Flowers of great size, measuring six inches across. Color dark, glowing crimson, shaded maroon. Magnificent.

DOROTHY PEACOCK—The most exquisitely beautiful bright seashell-pink Dahlia on earth. The flowers are of fine form, while the color is that beautiful live, clear pink that appeals to every one. Whether as a plant in the garden or for cut flowers, this new Dahlia has been the delight and admiration of all who have seen it.

GRAND DUKE ALEXIS—This is one of the most delicately beautiful of all Dahlias. Very large, perfect form, with long, thick quilled petals overlapping at the ends. White, slightly tinged and suffused delicate lavender. Ethereally beautiful. 35 cents.

LUCY FAWCETT—Sulphur-yellow, striped and spotted carmine-rose.

QUEEN VICTORIA—Pure canary-yellow. One of the freest bloomers. Good for cutting.

RED HUSSAR—Pure cardinal-red; fine.

ROBERT BROOMFIELD—Pure snow-white. Of large size. A very free bloomer. Grand for cut flowers. I recommend this variety.

SYLVIA, or Dolly—Flowers four to six inches in diameter; of fine form and full to the center, which is white, shaded to soft pink on the outer petals. In freedom of bloom next to the Countess of Lonsdale. A magnificent Dahlia.

CENTURY DAHLIAS

This is an entirely new race of Single Dahlias. I consider today that the new Century Dahlias occupy first place where beauty of coloring and artistic effect is desired. Owing to their immense size, long stems, graceful carriage, combined with their purity of color, or the blendings of colors, shades and tints, they entirely outclass all other Dahlias for cut flowers. Keep each variety when cut in a separate vase. Price, except where noted, 25 cents each; four Century Dahlias, costing \$1.00, for 85 cents.

CRIMSON CENTURY—Deep, rich velvety-crimson, shaded maroon, with rose halo around yellow disc.

FRINGED CENTURY—Intense rosy-carmine, with lighter edges, fringed or cleft petals; blooms all summer; fine for cutting.

PINK CENTURY—Of a clear rose-pink color, with long stems; a beauty.

VARIEGATED CENTURY—This, next to Geisha, is the gayest of all Dahlias. Dark oriental red, with yellow tips and markings. Superb. Very showy.

SPECIAL DAHLIA OFFER No. 65

The entire thirty-seven distinct varieties of Dahlias as catalogued, costing, if ordered singly, \$9.60, sent for a remittance of only \$7.50.

NEW FRENCH HYDRANGEAS

Let me tell my friends that these new French Hydrangeas are the most meritorious plants brought out in years. They have enormous trusses of bloom that completely hide the plant. They are half hardy and may be planted in the latitude of Philadelphia and in the Gulf and Pacific states. They are also fine as house plants, blooming in the spring time about Easter. When kept at a temperature of seventy degrees out of doors they bloom about June.

All the Following New Hydrangeas, Young Plants, 25 Cents Each; Strong Plants, 50 Cents.

AVALANCHE—A splendid large white, which has made a reputation for itself during the past two seasons. An easy variety to force.

BOUQUET ROSE—Large trusses of well-formed flowers, rosy-amber turning to bright pink; has proven a special favorite in the New York market this season.

E. G. HILL—This is the newest one and the very best, and is by far the best pink that I have yet tried; trusses of immense size. Color a most pleasing shade of baby pink that does not fade. Growth vigorous, foliage large and attractive. It is one of the easiest to force into bloom during the spring, coming into flower early.

GENERAL DE VIBRAY—A general favorite. Large heads of bright rose-colored flowers. A splendid early forcing variety.

LA LORRAINE—Large flowers; pale rose, turning to bright pink; has become a general favorite during past two years.

LILLE MOILLERE—Similar to, but distinct from, Eclair-
eur; a bright carmine-rose.

MME. AUGUSTE NONIN—An unusually attractive pretty pale pink, in heads of large size.

MME. E. MOILLERE—This has been the favorite white variety in the New York market this year; free flowering, of good size and form. Awarded silver medal at the National Flower Show at Boston last year. A great favorite with English growers, one London grower known to me handling over thirty thousand of this variety alone.

MOUSSELINE (The Famous Blue Hydrangea)—With me a beautiful plumbago-blue. The introducer describes it as a beautiful mauve-rose with cream-colored center; flower heads are large and held erect; a decided acquisition.

PRES. FALLIERES—Very delicate rose.

Hydrangea, Mousseline

RADIANT—Very deep carmine; one of the finest of Hydrangeas.

SOUVENIR DE MADAME E. CHAUTARD—One of the best, of splendid erect habit; very robust. Fine sized heads of bright rose-colored flowers. One of the best of the bouquet type.

Asparagus Plumosus Nanus

The Lace Fern

This graceful climber has to a great extent taken the place of the once popular Smilax in all fine decoration. It possesses the advantage of being much more graceful—its foliage being finer than that of the most delicate Fern—and it will last for weeks after being cut, the whole plant being of a bright, cheerful green. Excellent house plants, succeeding under almost any conditions; by pinching back may be grown as a plant. 20 cents each for fine plants; large, strong plants, 50 cents each.

Asparagus Sprengeri

The Emerald Feather Fern

A most desirable species, especially useful to grow as a pot plant for decorative purposes or for planting in baskets or vases. The fronds are frequently four feet long, of a rich shade of green, and most useful for cutting, retaining their freshness for weeks after being cut. It will make an excellent house plant, as it withstands dry atmosphere and will succeed in most any situation. 20 cents each; three for 50 cents; strong plants, 40 cents.

(Brilliancy, or Dr. Ross)

Leaves immense, eight to twelve inches long; looks like a Rex Begonia, and is just as beautiful. Cannot be excelled as a pot plant. The name aptly describes the appearance of this variety, which belongs to the giant-leaved section; of strong, vigorous habit, growing from two to three feet high, with leaves often nine to ten inches long, which are of bright carmine, shading off to a deep maroon, the margin being yellow and green, the whole leaf having a rich velvety luster. 25 cents each; three for 65 cents.

These Coleus are an entirely new break, as no one ever before heard of a Coleus that trailed. They both have glorious foliage, The Queen having a large distinct center of bright pink or red, with a broad border of emerald-green. In The Beauty, the foliage is a rich golden-yellow, often changing to pure white. No plants are more suitable or showy for hanging baskets, window boxes, vases or pot culture than are these two trailing Coleus. TENDER PLANTS—Continued

Beautiful and Fragrant Violets

Of all the delightful perfumes, that of Sweet Violets is the most delicate and pleasing. If grown in the house for winter flowers they should be kept at a low temperature, as they will not bloom freely where it is too warm. If left in the open ground during the winter, protect with a covering of leaves.

Double White Perpetual-Flowering Violet, SWANLEY WHITE, or Queen of Fragrance—Of all the white Violets this is the best, either for pot culture in the house or bedded out. In pots it grows luxuriantly and is loaded with flowers. It is not an uncommon sight to see as many as fifty large flowers open at once, presenting a beautiful sight, their delicious perfume filling a whole room. 20 cents.

LADY HUME CAMPBELL—A true ever-bloomer. This is one of the finest of all double blue Violets. It is simply wonderful in the number of beautiful flowers it produces. In color it is a shade of the richest intense blue. It is a charming contrast with the white variety. 20 cents.

New Imperial or Parma Violet

This is, without question, the largest, richest colored and most highly perfumed of all the single-flowering Violets. It blooms very freely, literally bending the plant with its lovely blue flowers of the largest size. Its blossoming season is longer than any other Violet. 25 cents each; the three Violets for 60 cents.

Otaheite Orange

Beautiful Dwarf Ornamental. Oranges cannot be shipped into either California or Florida.

This valuable and distinct variety of the Orange family is a dwarf, compact grower, with glossy deep green foliage, which has a decided odor of the Orange Tree of Florida, and is exceedingly floriferous, producing a wonderful profusion of pure white flowers of the most delicious fragrance, identical with the much-sought-after blooms of the Southern Orange groves. Otaheite fruits immediately after flowering, bearing fruit about one-half the size of the ordinary Orange, retaining in a marked degree their sweetness. This unique Orange cannot be equalled as a winter-blooming pot plant for house culture. Requires but little sunlight, and flowers and fruits when but twelve to fifteen inches high. As a pot plant this lovely dwarf Orange is one of the most novel and beautiful that can be grown. With a couple of plants you can have an abundance of the far-famed delicate and fragrant Orange blossoms. I have grown a large stock of clean, vigorous plants of this wonderful Orange that will bloom and fruit at once. I commend it to my friends as a novelty of sterling worth and merit. Fine plants, 25 cents each; strong plants, 40 cents each; extra large, strong plants, ready to bloom and bear profusely, 75 cents each.

Oleanders

These old-fashioned shrubs are becoming immensely popular again. I am growing and selling them by thousands. No plant makes more handsome specimens in tubs for the veranda or yard. Can be wintered in the cellar. 25 cents each; the set of three Oleanders for 60 cents.

LUTEA—Has double primrose-yellow flowers of a lovely shade; also fragrant. Scarce.

ROSEA VARIEGATA—The foliage is green, deeply edged with yellow; pink florets.

RUBRA—The crimson-flowered variety.

Ruellia Mokoyana

This is a charming indoor plant for culture in pots or may be used in vases and baskets; of bushy spreading habit and finely marked leaves, which are beautiful olive-green, delicately veined with silver and rich purple underneath. A neat and handsome plant, always bright and pretty. The flowers are exceedingly beautiful, trumpet-shaped, and of a rosy-lavender color, almost covering the plant in their great profusion. 25 cents each; three for 60 cents.

Fuchsia, or Ladies' Eardrops

Price, 20 cents each; the set of six for \$1.00.

BLACK PRINCE—This is, without question, the very finest Fuchsia grown for the amateur to cultivate. It makes a shapely bush, is robust in growth, free from disease and insects, and is probably the freest in blooming. I have seen specimen plants six feet in height and four feet across loaded with thousands of bright buds and blossoms of a beautiful waxy carmine or pink color. Certainly a plant of easy culture.

The Wonderful New Lemon

Ponderosa

I cannot ship Lemons into California or Florida.

My New Ponderosa Lemon is what I claim for it. Largest freest-blooming, fruiting and most delicious of all Lemons.

Nothing that has ever been brought to my notice in the plant line has caused half the commotion that this wonderful Lemon has. It is a true ever-bearing variety. On a plant six feet high no less than eighty-nine of the ponderous Lemons were growing at one time. It was a beautiful sight to see. The tree was blooming, and at the same time had fruit in all stages of development from the size of a pea up to the ripe fruit, showing it to be a true ever-bearer. Fruit has been taken from this tree weighing over four pounds. The Lemons have very thin rind for such large fruit. It is the juiciest of all Lemons, makes delicious lemonade, and for culinary purposes cannot be excelled. I have the entire stock of this Ponderosa Lemon, and guarantee the trees to produce the same large fruit. No budding or grafting necessary. Ponderosa Lemon is sure to become popular when it is known. It fruits when quite small, and makes a lovely house plant. Everybody can grow his own Lemons; it will fruit freely each year. Thrifty young plants, 25 cents each; strong 1-year-old plants, many of which will fruit this year, 40 cents; strong 2-year-old plants, 75 cents each.

Sansevieria Zeylanica

Zebra Plant

A beautiful plant, specially adapted for the decoration of drawing rooms and halls, as it stands dust and drought with impunity and requires scarcely any water. The leaves are beautifully striped crosswise, with broad white variegations on a green ground. It is a rare and beautiful plant, which should be abundantly grown for positions out of the reach of sunshine, where other plants will not thrive. It can be placed in any position in any room and do well. It has singular beauty for decorative purposes which other plants do not possess, and it is useful both in winter and summer. For vases and baskets it is a fine center piece, and grows splendidly out of doors during summer. Fine plants, 25 cents each.

Emperor Pansies

My Emperor Pansies are the best the world produces. They are the choicest large-flowering sorts, both of European and American growers. It has been my aim to make this the finest strain of this favored flower in existence. 5 cents each; six for 25 cents; 60 cents per dozen; twenty-five for \$1.00, net.

TENDER PLANTS—Concluded

New Pink Hibiscus, "Peachblow"

The flowers are double and from four to five inches in diameter, of a charming, rich, clear pink color, with small deep crimson center. It is one of the freest-flowering plant novelties recently offered. The color is an entirely new and beautiful shade, and it blooms abundantly and continuously during the summer and fall months. It blooms well in the winter in the greenhouse or in any sunny window. 35 cents each; strong, fine plants, 60 cents.

Price, 25 cents each. I have large plants of Hibiscus, ready to bloom, for 50 cents.

SINENSIS GIGANTEUS—This is a plant for house cultivation during winter or summer, or for planting outside during summer. It blooms at all times of the year. The plants branch freely and flower profusely, commencing to bloom when not more than a foot high. As a specimen plant for large pots it has an equal only in the Brugmansia. Its flowers are of enormous size, often eight to ten inches across, opening flat, and of such vivid crimson-scarlet color that they can be seen from a long distance like a flaming torch. They can be wintered in the cellar or pit with perfect safety; and if one does not care to grow them all winter, one should have one or two for summer display.

GRANDIFLORUS—Rich, glossy, cut-leaved foliage, literally covering the plant with scarlet-crimson flowers.

SUB-VIOLEACEOUS—Flowers of enormous size, beautiful carmine, tinted with violet. Probably the largest flower of the Hibiscus family, and an unusually free bloomer. I take great pleasure in recommending this fine plant.

The Shasta Daisy is one of the most marvelous productions in the flower line that has ever been brought to the notice of floriculturists. It is the first of a new type which has been obtained by hybridization and rigid selection through a series of years. Its first qualification is extreme hardiness. Second, it is perennial, blooming better and more abundantly each season. Third, it is not particular as to soil.

Fourth, it blooms for several months. Fifth, the flowers are extremely large and graceful, averaging about four inches in diameter, with petals of the purest glistening whiteness, which are borne on single, long, stiff, wiry stems. HARDY DECIDUOUS SHRUBS**The Ever-Blooming Butterfly Bush**

(*Buddleia Variabilis Magnifica*)

It was a matter of some thought before this highly desirable plant was finally christened with the common English name by which it goes. Several years ago there were imported from Europe some plant novelties, and this one was among them. I observed it carefully for a season and was charmed with its beauty, ease of culture and free-flowering habit. The name Butterfly Bush was applied to it because it seems to attract butterflies in large numbers. Particularly I notice that it is not alone the common little yellow species of butterfly, but also the large and gorgeously colored butterflies that swarm about it as though vying with it in brilliancy of color. This shrub from a young plant set out either in the spring or fall, will mature to full size the first summer, producing a handsome bush, which the first year often maintains a height of four feet. It produces long, graceful stems, which terminate in tapering panicles of beautiful lilac-colored flowers that are of miniature size and borne by the hundreds on a flower head which is frequently ten inches long. A single plant the first season will throw out as many as fifty flower spikes, which increase greatly in number during succeeding years. The year after planting, it generally commences to flower in June and continues each season until severe frosts nip it. The foliage and blooms are exceedingly fine. The shrub is rather semi-herbaceous, by which I mean in some latitudes it will die down to the ground, and while perfectly hardy, I recommend covering the roots with manure, leaves or other suitable materials as winter approaches, as this will produce a heavy growth the following season. This shrub is very desirable as an individual specimen on the lawn and in the garden, or placed promiscuously in the shrubby border. Fine plants, 25 cents each; three for 60 cents.

Buxus

Ornamental Box—*Sempervirens*

Useful for edging and bordering walks, etc. A handsome shrub with deep green foliage. This is not as dwarf as the *Sempervirens Nana*, but I find it so much more vigorous and hardy that I advise planting this and trimming to height required. 20 cents each; six for \$1.00.

Calycanthus Floridus

(Carolina Allspice, or Sweet-Scented Shrub.) A most desirable shrub. The wood is fragrant; flowers of a rare chocolate color, having a peculiar agreeable odor that is very penetrating. They blossom in June and at intervals afterwards. Fine plants, 20 cents each; strong 2-year-old plants, 50 cents.

Cydonia Japonica

(Japan Quince.) Has bright scarlet flowers in great profusion in early spring; one of the best shrubs. Fine plants, 50 cents.

Forsythia Viridissima

A fine hardy shrub. Leaves and bark deep green; flowers golden-yellow. Blooms earliest of all shrubs before the foliage comes. 25 cents; 2-year size, 50 cents.

Dear Miss Good:—

All the plants and seeds I ordered from you are doing finely. Respectfully,

Mrs. John Hilgartner, New Mexico.

Young plants, 20 cents each; strong 2-year-old plants, 50 cents.

Hydrangea Paniculata Grandiflora

A great favorite, and there is nothing finer or more showy, whether for planting in large masses in parks or for single plants on the smallest lawns. Blooms profusely from July until frost, in immense white panicles, tinted with pink and then with brown in the fully matured flower. The plant should be cut back each spring fully one-half of the past season's growth, as the flowers are much finer if the plant is treated in this manner. The flowers are much finer and larger if grown in a good, rich soil, but the plant is so hardy and so easily grown that success is almost certain in any kind of soil and in any situation. Young plants, 25 cents; strong flowering plants, for immediate effect, 2 years old, 50 cents.

Snowball—Viburnum

(*Viburnum Opulus Sterilis*.) (Guelder Rose.) A well-known favorite shrub of large size, with globular clusters of pure white flowers. The Snowball of our mothers' gardens. Blooms in May. One-year plants, 25 cents; 2-year plants, 50 cents.

Syringa or Lilac

Well-known beautiful shrubs, indispensable in every collection. It is doubtful if anything in the whole range of flowering shrubs surpasses these in grace and elegance, or in hardiness and usefulness. As decorative plants on the lawn or in the border they are without a peer. All of the Lilacs are deliciously fragrant. One-year plants of Lilacs, 12 to 18 inches high, 35 cents each; 2-year plants, branched, 18 to 24 inches, 60 cents each; any nine Lilacs, in 1-year-old plants, for \$2.75; in 2-year-old plants, any nine for \$4.50.

MONT BLANC—The branches of this beautiful variety are covered with white flowers that are deliciously fragrant. A grand species. 35 cents.

NOTE—The last named Philadelphus is away ahead of the old varieties. Being dwarf, it is superb for hedge planting.

“Bridal Wreath” Spirea

Spirea (Meadow Sweet)

These are beautiful shrubs of the easiest culture. Their blooming extends over a period of three months. One-year plants, 25 cents; strong 2-year-old plants, 50 cents.

ANTHONY WATERER—This beautiful gem makes a low, compact bush and is covered nearly the whole growing season with large umbels of deep crimson flowers which measure a foot across. When scarcely three inches high it begins to bloom, and thereafter is seldom out of flower.

As a pot plant or for growing in the open ground, nothing can equal it.
VAN HOUTTEI (Bridal Wreath)—Without doubt the very finest of all shrubs. With me in May and early June the plant is completely covered with a mass of large white flowers presenting a beautiful appearance. Named the “Bridal Wreath” on account of its long, graceful sprays of pure white.

Jasmine Primulinum

(New.) This is a grand new hardy Jasmine of bushy growth; star-shaped yellow flowers. Try this plant. 20 cents.

Kerria Japonica (Corchorus)

A slender green-branched shrub with globular yellow flowers from July to October; fine plants. 25 cents.

Lonicera Grandiflora

(Upright or Bush Honeysuckle.) A beautiful shrub, producing large, bright red flowers striped with white; blooms in June. 25 cents.

Lonicera Tartarica

(Tartarian Honeysuckle.) This Honeysuckle also grows in a bush form, bearing beautiful pink flowers which contrast beautifully when planted with Grandiflora, blooming at the same time. 25 cents.

Weigelia—Diervilla

They produce in June and July superb large trumpet-shaped flowers that almost hide the plant. They are very desirable for the border or for grouping and as specimens on the lawn. One-year plants, 25 cents; strong 2-year plants, 50 cents.

CANDIDA—A vigorous, erect grower; flowers pure white and produced in great profusion in June, and the plants continue to bloom through the summer, even until autumn.

EVA RATHKE—A charming Weigelia flower, brilliant crimson. A beautiful distinct clear shade.

ROSEA—An elegant shrub with fine rose-colored flowers; erect compact growth. Blossoms in June.

ROSEA NANA VARIEGATA—Of dwarf habit and possessing clearly defined silvery variegated leaves. Flowers nearly white. It stands the sun well.

HEDGE PLANTS

I Here Name the Most Suitable Plants for Hedges

Ligustrum—Privet

AMOR RIVER PRIVET (Amurensis)—This is a very graceful plant; requires little trimming. The leaf is small and rounded, plant branching, has not the stiff, formal effect that the California Privet has. This is the Amor River Privet from the north, and is hardy. 18 to 24 inches, 20 cents; \$2.00 per dozen; \$15.00 per hundred.

CALIFORNIA PRIVET OVALIFOLIUM—This makes when pruned a very formal hedge; will grow almost anywhere, thriving where other plants re-

fuse to grow. 18 to 24 inches, 15 cents; \$1.25 per dozen; \$8.00 per hundred.

Berberis—Barberry

(Thunbergii.) From Japan. A pretty species of dwarf habit. Small foliage changing to a beautiful coppery-red in autumn. A slower grower than the Privets, but needs no trimming and is a feast for the eye when full grown. One-year plants, 25 cents; \$2.75 per dozen; \$20.00 per hundred.

CHOICE FLOWER SEEDS

The letter A, B or P following the name of the variety signifies whether the seed is an Annual, Biennial or Perennial. Annuals bloom the first year from seed and die. Biennials bloom the second year from seed and die; although many Biennials, such as Aquilegias, Foxglove, Canterbury Bells, and others, from their habit of seeding themselves, are practically Perennials. Perennials do not all bloom the first year from seed. In vigor and bloom they increase for several years until their full beauty is reached. Nearly all seeds of Perennials are slow of germination, and should be planted in some quiet spot, where they may be kept moist and undisturbed for several months, before transplanting to the permanent bed.

DAISY COLLECTION

No flowers are so graceful for cut-flower work as those of the Daisy form. In the group named below are my own superb Alaska, or Shasta Daisy, and two from South Africa—Arctotis Grandis, and the Dimorpotheca hybrids; the latter two, so splendid and so little known, are as magnificent as the well-known Shasta Daisy.

As you are perhaps aware, all the plants we know as Daisies belong to the Chrysanthemum family, a widely scattered but tolerably distinct family. I have added others, that do not belong to the Daisy tribe, adding them for their color and flat-petaled form, their long stems and grace; these are the Cosmos, Gaillardia, and Coreopsis.

I grow all these flowers in my own garden, and because I can always gather a vase of graceful, clear-toned flowers for my table, it occurred to me that others might like to know of these for their own gardens, so it is with pleasure I offer this list for your consideration.

Agatheae Coelestis

Exquisite sky-blue; requires a sheltered position, tender, but will bloom all winter if lifted and potted in the fall; not so long-stemmed as the other Daisies, but chosen for its delightful color. Pkt. 5 cents.

Anthemis Kelwayi

Golden Marguerite. Deep golden; blooms from midsummer until frost; perfectly hardy. Pkt. 5 cents.

Arctotis Grandis

South African Daisy. Blooms very large; petals bluish-white above, pure lavender under side. Half hardy annual; one or two plants will supply hundreds of blooms. Flowers until hard freezing. Pkt. 5 cents.

Coreopsis Grandiflora

Clear, pure yellow; blooms early, and if cut back will give scattered blooms all season. Pkt. 5 cents.

Cosmos—Giant-Flowered Hybrids

There are two varieties of Cosmos—the tall late blooming, and the semi-tall early. I offer only the choicest large-flowered Lady Lenox hybrids in mixed colors.

Cosmos—Tall, late flowered. Pkt. 5 cents.

Cosmos—Early, semi-dwarf hybrids. Pkt. 5 cents.

Daisy, Alaska

This is the true Shasta Daisy, the Burbank hybrids, than which no finer can be bought. Hardy as an oak, grows finer each year. I have had them four inches in diameter with stem three feet long. Petals rich, heavy; blooms sometimes come semi-double, sometimes with exquisitely quilled hearts. Pkt. 15 cents.

Dimorpotheca Aurantiaca Hybrids

This is declared to be the greatest acquisition to the cut-flower florist and to the garden made within the last thirty years. Annuals where deep freezing occurs; will bloom all winter in the house if lifted early; are winter bloomers in Southern California; they are all-round grand flowers and must be grown to be appreciated. Colors range from orange, through yellow, salmon, pink, white and bluish-white; flowers three to four inches across. Pkt. 5 cents.

Gaillardia Grandiflora

The well-known hardy perennial. One of the standbys of the garden and for cut-flower work. Large flowers of rich mahogany-red zoned with yellow and lighter red. Try them in your brown Japanese basket. Pkt. 5 cents.

Pyrethrums

All the Pyrethrums are so variable in their coloring that only mixed seed may be offered. Blooms from mid-May to late July. Colors, white, pink, cerise, deep red. They bloom in unbelievable masses; are fine for cutting and the showiest plant for the garden I know of. True Daisies. Pkt. 5 cents.

SPECIAL OFFER

The above collection of ten packets of seed, costing 60 cents, sent to you for only 40 cents. This offer is net, and is not to be included when selecting premium.
